## Native Plant Project

### BEFORE YOU VISIT TECHE WOODS

Acadiana Native Plant Project is committed to providing the best experience for all users. Because everyone's interests, abilities, and energy is unique, this information is provided to help you plan your visit!

### THE GARDENS AT TECHE WOODS

Teche Gardens is a small demonstration garden. Most plants are labeled with signs near the plant. Each sign will have a picture of the bloom, the common and scientific names. A variety of blooms will appear at different times throughout the year. All of the plantings are native to Louisiana.

### THE TRAIL AT TECHE WOODS

Teche Woods is a nature trail which is unpaved, with uneven surfaces that are variable from soft to firm. The trail is approximately 150 yards long and takes 25 minutes to complete when walking at a leisurely pace. It is wide enough for two people to walk side-by-side. The trail is not suitable for wheeled mobility aids (wheelchairs, rollators, walkers with wheels).

Prior to opening our trail to visitors, we make every attempt to clear the path of large debris that would pose obstacles but please expect to encounter smaller natural debris (pine cones, etc.).

We encourage visitors to stay on the trail. We have provided arrows to clearly indicate the path.

Along the way, we have benches for opportunities to rest and enjoy the sights and sounds of nature!

#### Helpful Tips

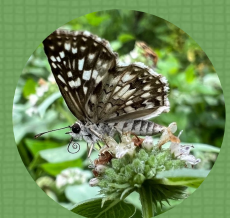

Bring your own hydration and bug spray.

No public restrooms are available.

All youth must be supervised by an adult. Our property is not fully fenced in.

Ample parking is available.
